

Fun, hands-on and
curriculum-aligned!

PRIMARY SCHOOL

WATER INCURSIONS

FREE!

HIGHLIGHTS

Designed by teachers and linked to the Victorian Curriculum, our incursions get students thinking, experimenting, and working together to discover:

- Where our water comes from.
- How we can save water.
- Why tap water is the best choice.

Our trained presenters at GWMWater make learning exciting with hands-on activities, experiments, and storytelling - all at no cost to your school!

CHOOSE YOUR WATER ADVENTURE!

FOUNDATION TO YEAR 2

Journey through the water cycle!

Join Phil the Bucket on a watery adventure! Through fun storytelling and games, students will explore the water cycle and learn why tap water is the best choice for a healthy body.

We are water warriors!

Can your class keep Phil's bucket full? Work together to complete water-saving challenges and discover simple ways to use water wisely at school and home!

YEARS 3 TO 6

Water for health and the environment

What happens to plastic waste? How does it impact our waterways? Students will experiment, predict, and investigate plastic pollution, soft drink ingredients, and why fresh tap water is the best choice for them and the planet.

What is the Urban Water Cycle?

Where does our water come from, and what happens after we flush? Students will test real water samples, explore how GWMWater treats and recycles water, and uncover what's really safe to flush!

WHY BOOK AN INCURSION?

- FREE and designed by teachers.
- Hands-on, engaging and interactive.
- Aligns with the Victorian Curriculum.
- Sparks curiosity and supports students' water literacy journey through a focus on water sustainability.
